PROFILE

I am a recent graduate with a Bachelor of Interior Design (Residential) from Billy Blue College of Design | Torrens University. My professional journey began in 2022 as a Colour Consultant, where I developed strong design sensibilities and refined my communication and client engagement skills.

Through both my academic and professional experiences, I have cultivated a design philosophy grounded in the balance between emotion and functionality—creating interiors that not only serve their purpose but also foster a deep sense of connection and belonging.

Most recently, my interior design internship has further expanded my understanding of spatial design, client relationships, and the business of design, reinforcing my commitment to crafting meaningful and considered spaces.
